Description:

Ulano M is a hugely versatile stallion for UK breeders. Archie has proven to be incredibly trainable, with three correct, elastic paces and a correct jump technique. Offspring have had success in showjumping, eventing and dressage at international level, ridden by both professional and amateur riders. Archie consistently passes on his amazing temperament to his offspring making them remarkably trainable and safe for riders of all levels. Archie offers correct conformation and good bone, with his offspring inheriting his strong sloping shoulder, uphill neck connection, with strong hindquarters.

Archie is particularly suited to more blood mares that require a stallion with good feet, correct conformation, good topline and a sensible temperament. He passes on his excellent walk and canter, alongside quick jump technique, producing reliably sound offspring.
